Introduction

What is a Section 42 enquiry?

This is set out in Section 42, Care Act. The Section 42 duty requires consideration of the following criteria under Section 42 (1) and (2) of the Care Act: In this framework we refer to these as the statutory criteria for decision-making. The below flowchart illustrates the criteria. This document is to be used as a guide to support this decision making, which action to take and who will undertake further enquiries if required.

Empowerment	<i>I am asked what I want as the outcomes from the safeguarding process and these directly inform what happens</i>	<p>The principle of empowerment means to ensure that people are being supported and encouraged to make their own decisions and give informed consent. People must always be treated with dignity and respect, with practitioners working alongside them to ensure they receive quality, person-centred care that ensures they are safe on their terms</p>
Prevention	<i>I receive clear and simple information about what abuse is, how to recognise the signs and what I can do to seek help</i>	<p>The principle of prevention recognises the importance of taking action before harm occurs and seeking to put mechanisms in place so that they don't reoccur.</p> <p>In practice this could look like:</p> <p>Immediate actions to take if there is a concern that abuse or neglect has or may take place</p> <ul style="list-style-type: none"> ➤ Seek medical attention if needed ➤ Record what you have found ➤ Seek advice from a safeguarding lead ➤ Check for other indicators ➤ Discuss with a manager or supervisor ➤ Monitor the situation to see if it improves ➤ After taking these steps, if the situation does not improve, raise your level of concern to 'abuse or neglect is suspected'

Proportionality	<i>I am sure that the professionals will work in my interest, as I see them and they will only get involved as much as needed</i>	<p>The principle of proportionality means to decide the least intrusive response appropriate to the risk presented by the individual. The Care Act 2014 emphasises the importance of considering an individual's wishes and circumstances and avoiding basing decisions on assumptions about a person's appearance, conditions or behaviour. This ensures that responses are balanced and holistic</p>
Protection	<i>I get help and support to report abuse and neglect. I get help so that I am able to take part in the safeguarding process to the extent to which I want</i>	<p>The principle of partnership recognises the effective safeguarding cannot be delivered in isolation of other partners and systems that interact with or impact on a person. Local solutions are best achieved through services working with their communities, professionals and services as a whole</p>
Accountability	<i>I understand the role of everyone involved in my life and so do they</i>	<p>The principle of accountability means recognising the importance of being open, clear and honest in the delivery of safeguarding and ensuring there are mechanisms in place to hold practitioners, services or systems to account</p>

Safeguarding Adult Review Criteria

Safeguarding Adult Boards must arrange a Safeguarding Adult Review (SAR) when:

An adult with care and support needs (whether or not those needs are being met by the Local Authority) in the Safeguarding Adults Boards (SAB) area has died as a result of abuse or neglect, whether known or suspect AND there is a concern that partner agencies could have worked together more effectively to protect the adult

Or/And

An adult with care and support needs (whether or not those needs are met by the Local Authority) in the SAB's area has not died, but the SAB knows or suspects the adult has experienced serious* abuse or neglect AND there is concern the partner agencies could have worked together more effectively to protect the individual

Or

The SAB has discretion to undertake a SAR in other situations where it believes that there will be value in doing so. This may be where a case can provide useful insights into the way organisations are working together to prevent and reduce abuse and neglect of adults, and can include exploring examples of good practice

Or

The SAN can also consider conducting a SAR into any incident(s) or case(s) involving adult(s) at risk of abuse or neglect where it is believed to be in the public interest to conduct such a review

*In the context of SARs, something can be considered serious abuse or neglect where, for example the individual would have been likely to have died but for an intervention, or has suffered permanent harm or had reduced capacity or quality of life (whether because of physical or psychological effects) as a result of the abuse or neglect.

Non Statutory Enquiries, also known as 'Other Safeguarding Enquiries'

There is no legal obligation on the Local Authority to undertake non-statutory safeguarding enquiries. Ordinarily, such adults would be signposted to sources of support instead. However, there is scope for the local authority to undertake a non-statutory safeguarding enquiry if agreed.

An example would be where the adult does not meet the 'three part test' but it is agreed that the risks are too high not to continue to take action. Examples of type of assessment includes

- S9 assessment
- S10 assessment
